

SUPERIOR LIVE TERPENE EXTRACTION

| SUPERIOR QUALITY AND PRODUCTION

The ETHOS XL is designed to provide high-volume cannabis and hemp processors the highest terpene extraction throughput and terpene quality available with microwave extraction. The technology selectively extracts live terpenes, helping to ensure your products maintain the natural flavor of the flower.

NATURAL AND FULL FLAVOR

HIGHEST YIELD AND CAPACITY

NO PURIFICATION STEP

FAST AND GREEN EXTRACTION

HIGH SAFETY

MAXIMIZED PRODUCTION CAPACITY

HIGH YIELD LIVE TERPENES

Extracting terpenes from fresh or fresh-frozen material is the optimal approach for preserving the natural terpene profile. Microwave technology provides high yield, live terpenes without solvents or other purification steps. The ETHOS XL streamlines your workflow and expedites the entire extraction process.

FAST IMPLEMENTATION

The ETHOS XL is designed to easily fit into the workflow for cannabis processors without method development or dedicated safety requirements. The system preserves cannabinoids throughout the terpene extraction process. After extracting terpenes, the same plant material can be run through other techniques to extract the desired cannabinoids for your final product.

SUPERIOR PRODUCTIVITY AND ROI

The ETHOS XL is the ultimate solution for processors that need to extract high volumes of live terpenes. The system is able to process 40 kg of cannabis per 8-hour shift. The system minimizes operator time, requires no purification or solvents, and can be easily integrated into the processor's extraction workflow.

40 KG PROCESSED
PER 8-HOUR SHIFT

120 MIN
PER RUN

ZERO PURIFICATION

HIGH YIELD

SAFER
