

# ETHOS UP

Superior flexibility & performance

Milestone understands the needs of today's analytical laboratory. Every lab has unique needs with respect to both sample types and productivity. Our ETHOS UP is highly-configurable, offering enhanced flexibility through a broad range of rotors to accommodate various application and throughput requirements.

## SK-15 HIGH PRESSURE ROTOR

High temperature and pressure capability for difficult applications.

## MAXI-24 HP HIGH PERFORMANCE ROTOR

Blends high-throughput and high-temperature/pressure capability into a single rotor.

## MAXI-44 HIGH THROUGHPUT ROTOR

Highest throughput for routine applications.
