

The ATS Advantage

ATS Scientific Inc. is a leading provider of high quality analytical instrumentation and materials processing equipment to the Canadian scientific community. Our head office and regional locations provide nationwide support for our entire product range with highly qualified and fully factory trained staff. We offer comprehensive installation, preventative maintenance plans and repair services in addition to the following:

- Complete bilingual support by a knowledgeable team
- All instruments compliant with CSA and other applicable regulations
- Emergency loaner instruments available
- Immediate delivery on a wide range of select instruments
- State-of-the-art laboratory facility for in-house and field demonstrations
- Factory trained sales and service support, on-going customer-focused training
- Educational webinars and events
