

LACHAT MICRODIST®

The ORIGINAL Revolution in Distillation Technology!

With the MICRODIST® system from Lachat Instruments, you can distill up to 21 samples for cyanides, sulfide or ammonia in 30 minutes; and phenolics and tritium in 90 minutes.

MICRODIST® eliminates the need for bulky, expensive, clumsy and time consuming glassware-based distillation units while accommodating liquid and solid samples.

EPA method for Cyanide in both drinking and wastewater. Ammonia and phenolics are considered equivalent for NPDES.
